(54) HANGER AND CHAIR WITH HANGER

COPYRIGHT: (C)1996,JPO

(57) Abstract:

PURPOSE: To provide a hanger which is attached to a chair and can be folded compactly when not used, and whose shoulder supports can be stably supported by a rotation axis of one support and that of the other one, and whose height can be adjusted by extending/shortening the vertical parts to support the hanger.

CONSTITUTION: This chair with hanger has a fixed board 10, a hanger support part 11 with horizontal parts 14 and 15 which are perpendicular to the fixed board and are parallel to each other, and a pair of shoulder supports 20 and 21 which are rotatable around the axes of the horizontal parts. Each horizontal part is to restrict the range of rotation of the shoulder support attached to the other horizontal part. The length of a pair of vertical parts between the horizontal parts and the fixed board may be adjustable. The fixed board of the hanger is attached to the rear surface of the back 1 of the chair.
